

## **DF30 – Needlecraft**

This ten week course is based around the needlecraft cross stitch. Students do not have to have any prior experience as the craft will be taught from scratch. Students learn four basic stitches which are commonly used:

- Cross Stitch
- Back Stitch
- French Knots
- Straight Stitch

When students have mastered the basic stitches they undertake a personal project. Projects can range in difficulty from the use of simple cross stitch kits to using software to convert photographs into cross stitch patterns for working with.

Materials needed for the course are available from Stitchcraft which is situated at 10 Earl Street in Dundalk. Materials for the first night are supplied by the teacher.
